**AEROFLEX COLORADO SPRINGS RECEIVES
ACCREDITATION OF TRUST FROM
DoD/DMEA**

Colorado Springs, Colorado – Aeroflex Colorado Springs announced today Trusted Accreditation by the Defense Microelectronics Activity as a Microelectronics Trusted Source for DoD and all other U.S. government users. Specifically, Aeroflex has been awarded Category 1A Trusted Accreditation for Design, Packaging/Assembly, Test, and Aggregation/Brokering of multi-project-wafers into Trusted Foundries.

The Trusted Foundry program, and subsequently a more broadly defined Trusted Integrated Circuit Supplier program, was established to combat risks and threats to the integrity of the integrated circuit supply chain. The purpose of this program is to provide an assured supply of high integrity, secure microelectronics to the U.S. Government. With this accreditation Aeroflex Colorado Springs can provide to its customers trusted chain of custody and secure supply chain solutions that interface with existing Trusted Foundries.

“Aeroflex Colorado Springs has historically provided secure microelectronic solutions to a broad spectrum of U.S. Government customers,” emphasized Roger Van Art, Vice-President Business Development. “The emergence of the Trusted Integrated Circuit Supplier program was a natural fit to our business model, and we are pleased to have earned this accreditation. Given our fabless model in which we are engaged with a variety of domestic foundries from design and backend services vantage points, this provides a complete chain of custody to our customers requiring Trusted Semiconductors.”

Aeroflex Colorado Springs is a supplier of semicustom and standard VLSI circuits and custom circuit card assemblies. Aeroflex, Colorado Springs has received Qualified Manufacturer List (QML) certification for Class Q, Class T and Class V. Additionally, we have received a letter of compliance for ISO 9001 from the Defense Supply Center Columbus.
