**AEROFLEX COLORADO SPRINGS RECEIVES
Re-ACCREDITATION OF TRUST FROM
DoD/DMEA**

Colorado Springs, Colorado – Aeroflex Colorado Springs announced today Trusted re-accreditation by the Defense Microelectronics Activity as a Microelectronics Trusted Source for DoD and all other U.S. government users, effective through September 2011. Specifically, Aeroflex has been re-certified as Category 1A Trusted Supplier for Design, Aggregation, Broker, Packaging/Assembly, and Test Services for another two years.

“Aeroflex Colorado Springs is pleased to have been awarded this Trusted Supplier re-accreditation,” said Roger Van Art, Vice-President, Strategic Business. “The emergence of the Trusted Integrated Circuit Supplier program two years ago was a natural fit to our business model, and our customers place great value in the end-to-end Trusted solutions offered through this platform. Given our fabless model, in which we are engaged with a variety of domestic wafer foundries from design and backend services vantage points, this provides a complete chain of custody to our customers requiring Trusted Semiconductors.”

The Trusted Foundry program, and subsequently the more broadly defined Trusted Integrated Circuit Supplier program, was established to combat risks and threats to the integrity of the integrated circuit supply chain. The purpose of this program is to provide an assured supply of high integrity, secure microelectronics to the U.S. Government. With this re-accreditation Aeroflex Colorado Springs can continue to provide to its customers a trusted chain of custody and secure supply chain solutions that interface with existing Trusted Foundries. As Program Offices require Trusted components, Aeroflex Colorado Springs is fully prepared to provide them with integrity.

Aeroflex Colorado Springs is a supplier of semicustom and standard VLSI circuits and custom circuit card assemblies. Aeroflex, Colorado Springs has received Qualified Manufacturer List (QML) certification for Class Q, Class T and Class V. Additionally, we have received a letter of compliance for ISO 9001 from the Defense Supply Center Columbus.

About Aeroflex

Aeroflex Incorporated is a global provider of high technology solutions to the aerospace, defense and broadband communications markets. The Company's diverse technologies allow it to design, develop, manufacture and market a broad range of test, measurement, microelectronic and motion control products. Additional information concerning Aeroflex Incorporated can be found on the Company's website: www.aeroflex.com.

All statements other than statements of historical fact included in this press release regarding Aeroflex's business strategy and plans and objectives of its management for future operations are forward-looking statements. When used in this press release, words such as "anticipate," "believe," "estimate," "expect," "intend" and similar expressions, as they relate to Aeroflex or its management, identify forward-looking statements. Such forward-looking statements are based on the current beliefs of Aeroflex's management, as well as assumptions made by and information currently available to its management. Actual results could differ materially from those contemplated by the forward-looking statements as a result of certain factors, including but not limited to, competitive factors and pricing pressures, changes in legal and regulatory requirements, technological change or difficulties, product development risks, commercialization difficulties and general economic conditions. Such statements reflect the current views of management with respect to the future and are subject to these and other risks, uncertainties and assumptions. Aeroflex does not undertake any obligation to update such forward-looking statements.
