AEROFLEX RAD OPENS EUROPEAN OFFICE

Colorado Springs, Colorado – Aeroflex RAD, a division of Aeroflex Incorporated, a wholly owned subsidiary of Aeroflex Holding Corp. (NYSE:ARX), announces the opening of Aeroflex RAD Europe in the United Kingdom to better serve the radiation testing needs of our existing and new customers in Europe.

“Aeroflex RAD is pleased to open an office in the Harwell Enterprise Zone, near Oxford,” said Dr. Joe Benedetto, Vice President and General Manager. “Customers came to us requesting an alternate source for radiation testing in Europe.”

Harwell Oxford has a 60 year history of excellence in science and technology. Today it is being developed into a world-leading hub for technology transfer and innovative businesses as part of a joint venture by global property group Goodman, the United Kingdom Atomic Energy Authority and the Science and Technology Facilities Council.

Dr. Richard Sharp will be the Managing Director of Aeroflex RAD European operation and business located in Harwell, Oxfordshire. Dr. Sharp has over 25 years of experience in the effects of radiation on electronic components, equipment and material along with numerous publications. He was most recently with Isotron and Synergy Health and was Conference Chairman for RADECS 2013. Aeroflex RAD Europe will perform high dose & low dose Cobalt 60 irradiation along with any required electrical testing. In addition, the European operation is equipped to conduct the more complex Single Event Effect testing often required by Aerospace customers.

Dr. Benedetto adds, “The Aeroflex RAD Europe office will open December 1, 2013 and will run all electrical testing, perform all radiation exposures and write all final reports for Aeroflex’s European customers. We look forward to serving these needs.”

About Aeroflex RAD

Aeroflex RAD is a comprehensive radiation effects test and support laboratory, offering Co-60, Neutron, Flash X-Ray/Prompt Dose capabilities, irradiation, device and ELDRS testing, quick-turn prototype IC assembly, and RadTolerant products to the HiRel marketplace.

About Aeroflex

Aeroflex Holding Corp. is a leading global provider of high performance microelectronic components, and test and measurement equipment used by companies in the space, avionics, defense, commercial wireless communications, medical and other markets.

Forward-looking Statements

All statements other than statements of historical fact included in this press release regarding Aeroflex's business strategy and plans and objectives of its management for future operations are forward-looking statements. When used in this press release, words such as "anticipate," "believe," "estimate," "expect," "intend" and similar expressions, as they relate to Aeroflex or its management, identify forward-looking statements. Such forward-looking statements are based on the current beliefs of Aeroflex's management, as well as assumptions made by and information currently available to its management. Actual results could differ materially from those contemplated by the forward-looking statements as a result of certain factors, including but not limited to, adverse developments in the global economy; changes in government spending; dependence on growth in customers' businesses; the ability to remain competitive in the markets Aeroflex serves; the inability to continue to develop, manufacture and market innovative, customized products and services that meet customer requirements for performance and reliability; any failure of suppliers to provide raw materials and/or properly functioning component parts; the inability to meet covenants contained in debt agreements; the termination of key contracts, including technology license agreements, or loss of key customers; the inability to protect intellectual property; the failure to comply with regulations such as International Traffic in Arms Regulations and any changes in regulations; the failure to realize anticipated benefits from completed acquisitions, divestitures or restructurings, or the possibility that such acquisitions, divestitures or restructurings could adversely affect Aeroflex; the loss of key employees; exposure to foreign currency exchange rate risks; and terrorist acts or acts of war. Such statements reflect the current views of management with respect to the future and are subject to these and other risks, uncertainties and assumptions. Aeroflex does not undertake any obligation to update such forward-looking statements. Any projections in this release are based on limited information currently available to Aeroflex, which is subject to change. Although any such projections and the factors influencing them will likely change, Aeroflex will not necessarily update the information, since Aeroflex will only provide guidance at certain points during the year.
