AEROFLEX RAD MOVES TO NEW CUSTOM BUILT 36,000 SQ. FT. RADIATION TEST FACILITY

Colorado Springs, Colorado – Aeroflex RAD, a division of Aeroflex Incorporated, a wholly owned subsidiary of Aeroflex Holding Corp. (NYSE:ARX), announces their move into a new facility in Colorado Springs, Colorado.

“Aeroflex RAD continues to grow its radiation test infrastructure in Colorado Springs. The first test facility was started over 20 years ago with a single Co-60 source in under 1000 sq. ft. of space,” said Dr. Joe Benedetto, Vice President and General Manager. “As a provider of radiation test services to the major satellite prime contractors and High-Rel component integrators for commercial and government programs, Aeroflex RAD needed additional space to support growing demands.”

Aeroflex RAD’s new 36,000 sq. ft. secure Radiation Test, Assembly and Screening facility, houses three cobalt-60 panoramic sources (one high dose rate and two at low dose rate), a cesium-137 source, a flash x-ray source, a krypton-85 F/G Leak Detector, a 1 MeV Pelletron and a 14 MeV Neutron source. The facility also houses an Assembly and Screening area, a Class 100 Clean Room and a Cryogenic Test Laboratory. Aeroflex RAD has tooling in place for more than 1000 different device types/package styles and in many cases can waive the NRE charge.

Dr. Benedetto adds, “Aeroflex RAD is ISO9001-2008 certified and has MIL-STD-883 and 750 DLA Laboratory Suitability for radiation effects testing, as well as many other high-reliability screening methods. Aeroflex RAD’s Laboratory Suitability for all radiation test methods saves customers both time and money as components can be qualified to multiple independent tests or combined testing without using multiple facilities. Aeroflex RAD looks forward to aiding our current and new customers with shorter turn times and reduced NRE for TID, ELDRS, SEE and prompt dose testing.”

For pricing or technical questions call 1-800-645-8862 or visit our home page at www.aeroflex.com/RAD.

About Aeroflex RAD

Aeroflex RAD is a comprehensive radiation effects test and support laboratory, offering Co-60, Neutron, Flash X-Ray/Prompt Dose capabilities, irradiation, device and ELDRS testing, quick-turn prototype IC assembly, and RadTolerant products to the HiRel marketplace.

About Aeroflex

Aeroflex Holding Corp. is a leading global provider of high performance microelectronic components, and test and measurement equipment used by companies in the space, avionics, defense, commercial wireless communications, medical and other markets.

Forward-looking Statements

All statements other than statements of historical fact included in this press release regarding Aeroflex's business strategy and plans and objectives of its management for future operations are forward-looking statements. When used in this press release, words such as "anticipate," "believe," "estimate," "expect," "intend" and similar expressions, as they relate to Aeroflex or its management, identify forward-looking statements. Such forward-looking statements are based on the current beliefs of Aeroflex's management, as well as assumptions made by and information currently available to its management. Actual results could differ materially from those contemplated by the forward-looking statements as a result of certain factors, including but not limited to, adverse developments in the global economy; changes in government spending; dependence on growth in customers' businesses; the ability to remain competitive in the markets Aeroflex serves; the inability to continue to develop, manufacture and market innovative, customized products and services that meet customer requirements for performance and reliability; any failure of suppliers to provide raw materials and/or properly functioning component parts; the inability to meet covenants contained in debt agreements; the termination of key contracts, including technology license agreements, or loss of key customers; the inability to protect intellectual property; the failure to comply with regulations such as International Traffic in Arms Regulations and any changes in regulations; the failure to realize anticipated benefits from completed acquisitions, divestitures or restructurings, or the possibility that such acquisitions, divestitures or restructurings could adversely affect Aeroflex; the loss of key employees; exposure to foreign currency exchange rate risks; and terrorist acts or acts of war. Such statements reflect the current views of management with respect to the future and are subject to these and other risks, uncertainties and assumptions. Aeroflex does not undertake any obligation to update such forward-looking statements. Any projections in this release are based on limited information currently available to Aeroflex, which is subject to change. Although any such projections and the factors influencing them will likely change, Aeroflex will not necessarily update the information, since Aeroflex will only provide guidance at certain points during the year.
